

Tecnobit

“...It eliminates the need for extensive manual updates, as OS Changer resolves the more complex porting issues.”

THE PROJECT:

Migrating legacy software to the Linux operating system

Tecnobit, a Spanish based company, was challenged with migrating legacy software to a new platform for the Spanish Armada. They Chose MapuSoft’s OS Changer to complete the port. The application using OS Changer is a simulator of a navigation console for a tactical data system.

Customer: Jorge Rodriguez Santos

Why Did Tecnobit Choose MapuSoft’s OS Changer?: “We recognized the product’s ability to save us a lot of time and money. Moreover, it eliminates the need for extensive manual tests to the ported software, as OS Changer resolves the more complex porting issues.”

On Performance: “The product performance was very high. In fact, once OS Changer was fully integrated, the ported application ran as quickly as the original.”

On Simplicity: “I needed only a couple of days to understand the product and start working with OS Changer.”

On Time: “By using OS Changer to complete our port, rather than doing it manually, we saved about three months on our project.”

On Technical Support: “MapuSoft’s technical support is absolutely fantastic. They resolved even my most complex issues very quickly.”

ABOUT TECNOBIT

Tecnobit, created in 1985, is an Industrial Electronics and Defense company which develops, designs, and produces professional electronic systems and equipment. The company specializes in design engineering and hardware & software development, as well as system integration and testing. Tecnobit works primarily on strategic national and international projects.
